

Number and Colour Matching

Sam's nose ran at birth, ran away that is. A quick thinking nurse replaced it with a doorknob. This new body part has given Sam a surprising superpower of being able to turn into the nearest door. This means Sam can hide, travel anywhere as a car, plane or rocket door as well as being able to unlock any door.

Sam is hiding as a door. Which door is it?

Can you then match the numbers and colour to correct doors?
