

Tig has the superpower of an amazing memory. This memory game can help you become more like Tig. This game is very simple to play:

1. Place 6 items on a tray, you child can help choose.
2. Cover the tray with a towel or other type of cloth.
3. Pop you hand under the cover and remove an item.
4. Can your child work out which item has gone.

To make this game more challenging you can add more items and items that are very similar looking. If you don't have a tray, cut around the square, ask you child to cover their eyes and place the square over one of the objects on our guessing tray.
